

Cube[®] Insert

Cube4Water.com

Used to provide relief during natural and man-made disasters around the world for over 40 years!

Rugged • Multiple Reuse • Space Saver

Government and disaster relief agencies state that one of the essential components of good emergency-preparedness kits is a container that will allow its owner to consume one gallon of clean water a day. Renown for both its compact design and ruggedness, the Cube[®] has achieved a solid reputation as a preferred water container by government and private sector personnel whose focus is emergency-preparedness and/or disaster relief.

Cube[®] Insert's many features and advantages include:

- Constructed of flexible yet rugged low density polyethylene, the Cube[®] features a unique, space-saving, nested design in shipping and storage that saves significantly over rigid container options!
- Molded handle included in design.
- 38mm screwcap opening (Included!) keeps contents clean and keeps dirt, dust, and grime out.
- Opening can also be fitted with optional screw-on faucet for even greater dispensing convenience.
- FDA compliant for water storage and food contact.
- Variety of sizes: 1, 2.5 and 5 gallon sizes readily available.

Are you a federal, state, local official, or a representative of the private sector, who'd like to learn more about the many features and benefits of the Cube[®] Insert, as well as receive your free sample for further review?

Using the contact information noted below, please call or write us. Easy, safe, and convenient water collection and dispensing can be yours with one phone call or e-mail!
